

Serial No.: 10/527,606

IN THE CLAIMS:

Please amend the claims as follows:

1-34. (Canceled)

35. (Withdrawn) A method of coiling a medicament carrier in preparation for loading the coiled medicament carrier into a housing of a medicament dispenser, said carrier having the form of an elongate strip and having multiple distinct medicament doses carried thereby, the method comprising:

- (a) receiving the leading end of the elongate medicament carrier by a spindle; and
- (b) forming a coil of the elongate medicament carrier with the medicament doses therein on the spindle by rotating said the spindle whilst moving the spindle in a lateral sense whilst keeping the elongate medicament carrier generally static.

36. (Currently Amended) A method of coiling a medicament carrier in preparation for loading the coiled medicament carrier into a housing of a medicament dispenser, said carrier having the form of an elongate strip and having multiple distinct medicament doses carried thereby, the method comprising:

- (a) receiving the leading end of the elongate medicament carrier by a spindle; and
- (b) forming a coil of the elongate medicament carrier with the medicament doses therein on the spindle by rotating said the spindle whilst keeping moving the elongate medicament carrier in a lateral sense.

Serial No.: 10/527,606

37. (Withdrawn) A method of coiling according to claim 35, wherein the spindle frictionally engages the elongate medicament carrier.

38. (Withdrawn) A method of coiling according to claim 35, wherein the end of the elongate medicament carrier is received within a slit provided to the spindle.

39. (Withdrawn) Coiled medicament carrier obtainable by a method according to claim 35.

40-42. (Canceled)

43. (New) A method according to claim 36, wherein the medicament carrier comprises blister pack form.

44. (New) A method according to claim 43, wherein the medicament carrier comprises a peelable blister strip comprising a base sheet, in which blisters are formed to define pockets therein for containing distinct medicament dose portions, and a lid sheet which is hermetically sealed to the base sheet except in the region of the blisters in such a manner that the lid sheet and the base sheet can be peeled apart.

Serial No.: 10/527,606

45. (New) A method according to claim 36 comprising associating the coiled medicament carrier with a retainer for retaining the coiled form.

46. (New) A method of coiling according to claim 36, where in the spindle frictionally engages the elongate medicament carrier.

47. (New) A method of coiling according to claim 36, wherein the end of the elongate medicament carrier is received within a slit provided to the spindle.
